

## **AGI/Klearfold Europe achieves excellent results in customer satisfaction survey**

From April to June 2006 a satisfaction survey was conducted among more than 40 customers from 10 European countries, the USA and Asia. These primarily global companies, operating in the segments of tobacco, confectionery, cosmetics, apparel and spirits consistently lauded the high quality of AGI/Klearfold Europe's products.

The customers surveyed were especially satisfied with regard to AGI/Klearfold Europe's "innovative packaging design", "innovative concepts and technologies" and "product development" where AGI/Klearfold Europe scored extremely well compared to its competition.

"Over the past few years we have invested a lot of money in design and innovation, hired many specialists and trained our sales and customer service people to serve our customers even better. Now it is paying off: our customers perceive us as an innovative, reliable partner for packaging design and solutions", said Leonhard K. Rodrigues, European Sales Manager AGI/Klearfold Europe.

These survey results emphasize AGI/Klearfold Europe's image as the innovation leader on the global packaging market, further illustrating the company's ability to offer a clear competitive advantage to its customers.
